

## Product Name

Speedline Joint Butter

## Composition

Pre-mixed, ready-to-use paste.

Can be applied manually, mechanically, and airlessly.

## Properties

- Fewer air bubbles compared to regular pastes.
- Up to 30% less shrinkage than with regular pastes.
- Good adhesion.
- Resistant to cracking.
- Excellent sanding properties.
- Easy to apply.
- Up to 15% lighter than regular pastes.

## Application

- Suitable for indoor use.
- For finishing plasterboard with beveled edges and a sand-lime brick finish.
- Use with paper, glass fiber, or mesh tape.
- The first coat must be thoroughly dried before applying the second coat.
- For butt joints without AK, use glass fiber or paper tape.
- Short mixing is recommended.
- Dilute with a maximum of 0.3 liters per 18.7 kg.
- Use above 5°C.
- Always wear approved safety glasses and a dust mask when sanding.

## Substrate

Joint Butter is ideal for finishing plaster, plaster tiles, plasterboard, plaster blocks, sand-lime brick, and concrete. It is important to ensure the substrate is completely dry. Can also be applied to painted substrates if the surface is clean and not powdery.

For glossy surfaces, first sand, remove dust, and use an impregnating primer if necessary. Surfaces should be clean, dry, and free of grease, wax, and polish before use.

Do not apply to areas (such as showers) that are directly exposed to water.

## Apply

Ensure that all fasteners and joints are thoroughly dry before applying Joint Butter. If a wall or ceiling has been finished with Joint Butter and is ready to be coated with a paint or wallpaper system, we recommend applying a primer first.

## Packaging

17 liters (18.7 kg) in a plastic bucket / 15 liters (16.5 kg) in a bag.

## Storage

Shelf life: approximately 1 year when stored in a cool, frost-free place.

## Safety

It is recommended to adequately protect the eyes, nose, mouth, and skin with personal protective equipment when using pre-treatment products. If Speedline Joint Butter comes into contact with the eyes, rinse immediately with plenty of clean water (approximately 15 minutes). Consult a doctor afterwards.

## Specifications

Do not use below a surface and air temperature of +5°C or when frost is expected. Contains a biocide. Contains BIT. Contains Methylothiazolone. Contains C(M)IT/MIT (3:1). May cause an allergic reaction.
